

CodeCraft: Legends of the Grid

A creative adventure video game where learning to code is your superpower. Explore, build, and save the digital world.

ACTIVITY 3 - TECHNICAL SHEET

The Game Universe

What is CodeCraft about?

CodeCraft: Legends of the Grid is an **adventure and creative sandbox** video game where players explore and rebuild a destroyed digital world using real code.

Genre

Adventure / Creative Sandbox

Platform

PC and Web

Players

Students and enthusiasts ages 10 and up

The Characters

Ada

Protagonist. A young apprentice who explores and rebuilds the digital world using code.

Buggy

A small guide robot who accompanies Ada through every level and gives hints.

The Guardian

The game's mentor. Teaches the fundamentals of the compiler and logic.

Glitches

Bug creatures that distort the map. You must fix them with code!

The Hero's Journey

The Three Levels

Level 1 : The Syntax Valley

You'll learn basic movements and commands. The starting point for every programmer.

Level 2: The Mountains of Loops

Automation of structures and block collection. Loops are your new tool.

Level 3: The Core of the System

You'll face the "Bug Master" using functions and advanced logic. The final challenge!

Main Features

Everything You Need to Create

Two game modes

Campaign (story) and **Creative** (free building without limits).

Visual code editor

Interactive programming blocks inside the game itself.

Full customization

Customize Ada, save your worlds, and share your projects.

Behind the Code

Technology and Engine

Language

C# in the **Unity** engine, or **Python** as an educational alternative.

Platforms

PC and Web. Accessible from any device with a browser.

Database

Yes. Stores the player profile, inventory, and created worlds.
